***PCS Approves AGM Telecom as Inmate Telecom Provider:***

---

Approved Inmate Telecommunications Equipment Provider

After an extensive approval process based on technical expertise, knowledge of the inmate corrections industry, and features and functions of inmate telecommunications equipment, AGM received the seal of approval from Public Communications Services Inc., the foremost forward thinking and best in class Inmate Communications Service Provider in the nation, to use AGM's equipment in County and State corrections facilities.

AGM as an approved equipment provider has deployed with PCS 53 facilities with over 3,500 phones. With PCS' high service standards focused on correctional facility clients, the inmates and their families and friends, AGM is continuing to develop the best in class equipment that will provide corrections officers with leading edge investigative and administrative tools while providing inmates and their friends and families with the highest quality communication options and advanced payment selections.

In addition, AGM serves many correctional facilities under its own direct management. Currently, AGM serves 85 facilities with over 1,500 phones. Combined, AGM's Inmate Telephone Services Equipment is deployed and operational in 138 facilities serving over 5,400 inmate telephones providing services to their families and friends.

*About PCS (<http://www.pcstelcom.com>)*

---

PCS, a pioneer in collect and debit phone services, installs and maintains secure, reliable and turnkey inmate phone systems nationwide. For more than 20 years, PCS principals have specialized in inmate communication systems. Few companies in the nation have shown this kind of long-term commitment to inmate communications at correctional facilities. Federal, state and county prisons, as well as private institutions, have found the PCS Communication Command Center to be the smart solution to inmate phone services.

PCS has the experience and technology necessary to customize your inmate communication systems regardless of size or population type. You will be in control and in command of all inmate calling, but not burdened with daily management. Accountability and security are built into your new system with every inmate call. In addition to providing reliable collect and debit services, PCS consistently offers new products like inmate voicemail system and Daily Dial™, our easy to use prepaid calling service; as well as innovative rate structures that include flexible rate plans.

*About AGM Telecom (<http://www.agmtelecom.com>)*

---

Founded in 2004, AGM Telecom is a telephony service provider designed for correctional institutions that offers complete end-to-end calling solutions. AGM Telecom's technology is developed exclusively for the corrections market by a dedicated and proven development team. Driven by the leadership of its experienced management team to focus on the basics of providing quality services, the company supports correctional institutions for inmate calls including specialized call processing, fraud control and validation, automated clearinghouse, pre-paid and direct billing services as well as a user friendly interface. AGM Telecom's goal is to provide correctional facilities with easy and flexible functionality, value, and quality services to maximize the effectiveness and efficiency of inmate calling.
